

FL-USA 400 Eight Port Conference Bridge— product manual and brochure available on web at www.FreelineUSA.com

The FL-USA 400™ Voice Conference Bridge

The compact FL-USA 400™ eight port conference bridge is a stand alone system compatible with virtually any PBX or Key System. Also a perfect compliment to our FL-USA 800™ VoIP System. The FL-USA 400™ supports full "Dial-Out" capability, as well as, secure "Meet Me" PIN authenticated conferencing. Provide a virtual meeting room, using your existing PBX or Key System— the FL-USA 400™ is a great way to improve your employee productivity. Truly plug and play, no user configuration is required.

Call volume and tone is excellent, full-duplex, and is not degraded based on the number of conference attendees. Once a conference call is in session the bridge can be locked by the Chairperson. This prevents eaves dropping, and accidental interruption of your conference call in progress. The Chairperson may choose to "Open" the bridge at any time to accept or invite new attendees. Excellent call security.

Typical installation requires eight PBX extension lines placed in a rotary hunt group, or eight public telephone lines in the same configuration. Unique passwords for management, chairing a conference call, and attending a conference, insure no unintended access to your new dedicated conference bridge.

FL-USA 400™ Conference Bridge *order one or more systems as your company needs require*

Model No. FL-USA 400™ Eight Port Conference Bridge

Conference bridge model FL-USA 400™ connects a maximum of eight PBX extensions **OR** eight central office telephone lines for high quality conference services. Supports up to eight simultaneous conference attendees. Users may dial in, or optionally the Chairperson may dial out to add new attendees as required. Based on digital signaling processing (DSP) technology the bridge automatically configures levels, echo and user access for crisp and clear conference calls. The system offers optional user conference recording through use of an external micro-cassette recorder. Compact in size, 10 Watts, 120 Volts AC Power.

Price Each: \$3495

Government Contract Price Each: \$3075
